

ASI CONSULTING GABON

Legal and Strategic Expertise: Reducing Your Risks

For international groups, we are the strategic interface; we ensure performance between global standards and local realities.

Establishing a presence in Central Africa is not simply a matter of geographical expansion; it requires a complex balancing act between global compliance standards and a local administrative reality with its subtle codes. In this environment, ASI Consulting is not merely a service provider, but the bridge which reassures investors. The firm transforms regulatory complexity into operational agility, ensuring that decisions made at headquarters are flawlessly executed on the ground in Gabon.

Our identity is based on absolute mastery of "Local Content" and world-class analytical rigor:

- **Anchoring and Identity:** A team of 100% Gabonese experts and corporate lawyers, based in Libreville and Port-Gentil, offering an immediate understanding of administrative and social practices.
- **Cutting-Edge Sector Expertise:** A strong specialization in the critical sectors of Oil, Gas and Mining, meeting the requirements of extractive industries.
- **Consolidated Experience:** 14 years of strategic interventions with major international companies, combining in-depth knowledge of the economic fabric and mastery of OHADA standards.
- **Independent positioning:** As a strategic and operational support firm, ASI Consulting prioritizes factual analysis and on-the-ground collaboration. We work upstream or in conjunction with regulated professions (bailiffs, lawyers), to whom we refer our clients for reserved acts and follow-up.
- **Institutional Integrity:** A total commitment to combating money laundering and corruption, aligned with the ethical requirements of international compliance departments. This trusted framework allows for anticipating disruptions and streamlining legal processes to ensure business continuity.

Our centers of expertise ensure proactive and factual compliance management.

Operational sustainability in Gabon requires rigorous due diligence documentation. ASI Consulting employs a structured approach to mitigate tax, social, and contractual risks before they escalate into financial or reputational crises.

1. **Compliance and risk reduction:** Comprehensive mapping of local exposures. We produce the due diligence evidence necessary to reassure central management and regulators.
2. **Taxation, administrative engineering:** Securing data flows with government agencies (Tax, Customs, CNSS, CNAMGS). Specific expertise in Shadow Payroll to guarantee compliance with international financial flows. We monitor and prepare the documentation required for the secondment of an expatriate employee to Gabon in accordance with bilateral agreements.
3. **Business law and contract management:** Auditing and securing the value chain under the OHADA UNIDROIT framework, preventing disputes with local and international partners.
4. **Labor law and work environment:** We intervene in sensitive cases (employee representatives, unions), and secure contract terminations, drafting settlement agreements to avoid litigation.
5. **Duty of Vigilance (CSDDD):** We carry out the *due diligence* on the ground to protect the French parent company from any legal action before the Paris Judicial Court in the event of failure of the subsidiary or suppliers.
6. **Support for international companies:** Management of international mobility and obtaining Individual Employment Authorizations (IEAs). Control of the Stable Establishment risk (183-day rule and 6-month construction period) to protect the tax status of the head office.
7. **Complex Case Management:** Production of factual timelines and summaries to support decision-making in crisis situations. Performance and Results: For example, thanks to rigorous expertise and effective administrative support, ASI Consulting enabled an international group to reduce a tax reassessment from 32 millions Euros to 2.3 millions Euros. Our teams are available 365/24/7 to guarantee continuous advisory support to general and financial management.

Directed by: Nicolas Soulé's Acuity

Solving complex problems in industrial sectors requires a hybrid vision, capable of translating technical constraints into legal imperatives.

The profile of Nicolas Soulé, founder of ASI Consulting, offers this essential dual perspective for leaders. A graduate engineer from a French engineering school (ENSI), an expert and field lawyer able to write law, he combines senior management experience in France and internationally (Kuwait, Indonesia) with 14 years of experience managing critical projects in Gabon.

He knows how to analyze complex situations, be proactive, and deliver results.

His expertise is sought both for state projects (IBOGA biometrics project) and by the World Bank for strategic studies on oil and gas markets.

Formerly the director of a service company in Port-Gentil, he possesses an immediate understanding of the industrial realities of his clients (Kca Deutag, Caroil, Dixstone, etc). More than a consultant, he acts as an independent facilitator, capable of identifying real bottlenecks and providing readable and factual files to secure the arbitrations of general and financial management.

He is recognized for his expertise, actions, and proposals. He can facilitate and resolve complex situations locally.
